Wednesday 20 May: 18.30

What if the world embodied our highest potential? What would it look like? The Global Oneness Project uses film to explore how the radically simple notion of interconnectedness can be lived in our increasingly complex world.

Since 2006 the project founders have been gathering stories from around the world about people who base their lives and work on the understanding that we bear great responsibility for our shared world. These stories have been compiled in a series of short-films available online at www.globalonenessproject.org. Join us at The Hub to watch these films together and be triggered into a conversation about our ways of individually and collectively expressing oneness.

The film is free for members, guests are welcome and asked to pay a small contribution to the cost of running The Hub this evening. Come at 18.30 if you want to share in ordering some locally-sourced healthy and fair pizza. Bring your own drinks.

"We can't solve problems by using the same level of consciousness we used when we created them."
-Albert Einstein
